

GLOBAL POPULATION MAPPING

U.S. Census Bureau Subnational, International Population Maps and Data

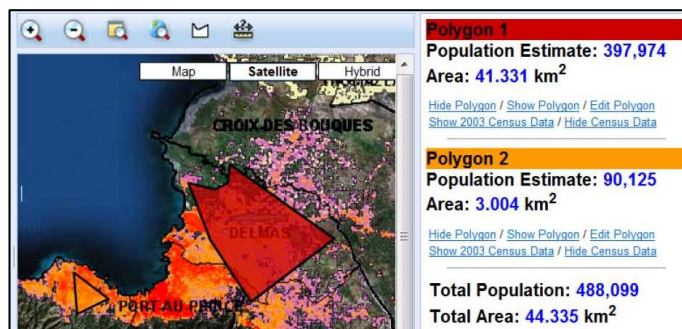

Global Subnational Population Data

This dataset, with **complete global coverage**, contains recent 5-year age/sex group population estimates based on the census data for approximately 70,000 subnational units. These data are linked to GIS polygons and available at the first, second, and third administrative levels for many countries. **Custom data and mapping are available on a reimbursable/contract basis.**

Gridded Population Data

Demobase features nationwide population estimates for **100 meter grid cells**. With gridded data, users can generate small-area population estimates for custom polygons. Rigorous methodology ensures the **highest quality** estimates. Countries available: **Haiti, Pakistan, Rwanda.**

Library of International Census Data

The Census Bureau Library's International Collection has **more than 115,000 statistical volumes** from almost every country and territory, along with materials from the United Nations, the World Health Organization, and other international agencies. The library is located at the Census Bureau headquarters and **open to the public**, by appointment. Please call 301-763-2511 to schedule a visit.

International Assistance

For over 60 years, the Census Bureau has performed international analytical work and provided technical assistance in the collection, processing, analysis, dissemination, and use of statistics with counterpart governments in over 100 countries.
